

# Candle Flame Reading

Reading candle flames is usually called **pyromancy**. This practice is deeply rooted in Greek mythology as fire was a very important part of life.

- ★ If the flame burns brightly, it is considered a **sign of success**.
- ★ A dim flame indicates **disappointment**.
- ★ A flickering flame shows **wavering fortunes**.
- ★ A spark means **an important message** will be delivered to you.
- ★ Jumping candle flames represent that **there is a lot of energy**.
  - ★ Dancing flames indicate **change**.
  - ★ A spiral-like effect is a **warning**.
- ★ When candles are hard to light, and then burn with a weak flame, it is a sign that **the time is not right** for the magic.
- ★ If a candle goes out for no apparent reason (i.e. a breeze) stop the ritual and **conduct it again later**.
