

Child Blessing

To welcome a new baby into the world

Dear Child,

May you go forth and begin the journey of life,
May the earth gently receive your feet
May the ancient trees of the forest be there
To guide you toward the wisdom that you seek

When you have moments of searching
Let the sun light up your divine intuition inside,
Let the wind deliver to you courage, when you need it,
May the ocean surf keep you free & wild

May you always be surrounded by love and family
Like birds that travel together in a flock
When you encounter a river too wide to brave alone
We will be there to help you cross

Let Father Sky be your protection
May he reveal constellations to help guide your way
Let Mother Earth nurture you
With beauty and abundance to fill your days

May the gentle flowers show you compassion
May the mountains give you strength
May the streams deliver you inner-peace
May nature be your teacher, and your friend

May you keep a twinkle in your eye
Bestowed unto you by the stars
May the moon be a nightly reminder to you
Of the cosmic miracle that you are
