

# Your Spell is Working

Spells are a type of spiritual exercise where we channel energy and focus towards a wish. Each spell is different and will depend on many factors. Here are five clear signs that a spell you cast is working:

## ★ Changes in mood

A feeling of happiness and clarity right after casting the spell is a very good sign. If you don't feel anything, stay positive anyway.

## ★ Signs and omens from Nature

Signs will come in the form of birds, weather changes, cloud formations, or in the trees. Develop your intuition to find them.

## ★ Messages in dreams

Pay attention to the emotions that each dream triggers. Positive dreams bring optimism and presage good results. Write your dreams down and analyze them.

## ★ Coincidences

Coincidences don't happen just without reason. It's important to pay attention to them and take them seriously.

## ★ Real-life interactions and results

Anytime something unexpected happens, it's a clear sign of your influence. Take advantage of all new opportunities.

## **You're now a Real-Life Witch!**

The power of your Witchcraft is starting to manifest in real life. Keep up the hard work!
