# Full Moons \* 2023

JANUARY 6

CANCER  
Wolf Moon

This year will have thirteen full moons, two in August. This is a relatively rare occurrence sometimes referred to as a 'blue moon'.

As the moon cycles, it passes through the signs of the zodiac, with each Full Moon happening during a specific transit.

The Moon governs our emotions, our needs, our search for security and balance and our physical bodies. In ancient times, the changing of seasons was tracked by lunar months rather than the solar year,

- **The New Moon** is the first phase of the lunar cycle. An opportunity for a fresh start, use it to establish a general intention for the lunar month that begins. Work on your personal space: clean your ritual area, start or decorate your Book of Shadows, look up spells online, or take a cleansing bath.
- ◐ **The Waxing Moon** is a great time for growth and self-healing. As the moon is growing in shape, you can focus on attracting abundance creatively. Carry out health and beauty treatments, increase your self-esteem and self-love. Cast spells for good luck, family and fertility, and work on developing your Powers of Manifestation.
- **The Full Moon** represents the culmination and success of everything you started during the previous weeks. If you have been working on a love spell, this is when you will see the best results. Use the power of the full moon to cast any type of spell with confidence. Now everything is in its fullness. Act on your desires and take chances!
- ◑ **The Waning Moon** gives closure to the cycle. Let the energy of this moon quietly finish any removal processes. Use this opportunity to remove yourself from destructive relationships, negative behavior patterns or anything harmful in your life. Close any pending issues and quietly renew your inner energies.
